

AMAN E ROME

Full-Stack Developer | IoT & AI Specialist | Real-World Project Developer

CONTACT INFORMATION

- **Phone:** +92 349 666 2127
 - **Email:** iamarkhan001@gmail.com
 - **Location:** Mingora, Pakistan
-

PROFESSIONAL SUMMARY

Innovative Full-Stack Developer with a Bachelor's degree in Computer Science (3.4 CGPA) and proven expertise in designing and deploying real-world IoT and software solutions. Specialized in end-to-end application development, hardware-software integration, and AI-driven systems. Demonstrated success in developing production-grade applications including Smart Garbage Management System with IoT hardware synchronization, comprehensive gym management platform, social networking applications, and cutting-edge forensic facial recognition technology. Proficient in modern web frameworks, mobile development, cloud technologies, and emerging AI/ML technologies. Committed to delivering high-impact solutions that solve complex real-world problems.

CORE COMPETENCIES

Backend Development: Node.js, Express.js, Python, Django, RESTful APIs, Microservices Architecture

Frontend Development: React.js, React Native, HTML5, CSS3, Tailwind CSS, Material-UI, Responsive Design

Databases: MongoDB, PostgreSQL, MySQL, Firebase, Real-time Data Synchronization

IoT & Hardware Integration: Arduino, Sensor Integration, Real-time Data Processing, Hardware-Software Synchronization

AI & Machine Learning: Facial Recognition, Jaw Detection, Computer Vision, TensorFlow, OpenCV

Tools & Technologies: Git, Docker, AWS, Firebase, Postman, Figma, Agile Methodology

Mobile Development: React Native, Cross-platform Applications, Flutter

Other Skills: System Design, Database Optimization, API Development, Debugging, Problem-Solving

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Self-Employed / Freelance

2023 - Present

Developed and deployed multiple production-grade applications combining frontend, backend, and emerging technologies:

Smart Garbage Management System (IoT + Full-Stack)

- Engineered end-to-end IoT solution integrating hardware sensors with cloud-based software platform
- Designed Arduino-based sensor system for real-time garbage level monitoring and automatic notifications
- Developed Mobile application (Flutter + Firebase + Firebase Real-time database) for fleet management and route optimization
- Implemented real-time data synchronization between IoT devices and mobile applications
- Created automated alert system for waste collection teams with GPS tracking
- **Impact:** Reduced collection time by 40%, improved operational efficiency, and enabled data-driven decision making

Gym Management Website (Full-Stack)

- Built comprehensive gym management platform with member portal, class scheduling, and billing system

- Implemented user authentication, membership tiers, payment integration, and attendance tracking
- Designed responsive UI with real-time class availability and instructor management
- Developed admin dashboard for analytics, revenue tracking, and member insights
- **Technologies:** HTML, CSS, PHP, MySQL.
- **Impact:** Streamlined gym operations for 500+ members, automated billing, increased member engagement

Couple Nest Application (Mobile app)

- Developed social networking platform for couples with real-time messaging and shared features
- Implemented user profiles, matching algorithm, and relationship timeline features
- Created real-time notification system and media sharing capabilities
- Built cross-platform application (Flutter + Firebase + Cloudinary)
- **Technologies:** Flutter, Dart, Firebase, Real-time Database, cloudinary
- **Impact:** Launched MVP with 1000+ active users, positive community engagement

Forensic Facial Recognition System (AI/ML - In Progress)

- Pioneering development of advanced facial recognition system for forensic identification
- Implementing jaw and face geometry analysis for suspect identification
- Integrating computer vision algorithms with law enforcement databases
- Developing high-accuracy detection model using deep learning techniques
- **Technologies:** Python, TensorFlow, OpenCV, Deep Learning, Computer Vision
- **Status:** Core algorithms developed, currently in testing and refinement phase
- **Potential Impact:** Revolutionary tool for forensic investigation and criminal identification

Sales Representative & Catalogue Editor | Zamashops

March 2024 - February 2025

- Managed product catalog optimization, improving product presentation and accuracy
- Promoted products across multiple online marketplaces, increasing visibility and sales performance
- Engaged customers and provided high-quality service, maintaining 95%+ satisfaction rating

- Contributed to 30% increase in online sales through strategic marketing and listing optimization
-

Co-Facilitator, English Proficiency Programme | Youth Development Institute

November 2021 - March 2022

- Co-facilitated four-skill enhancement program (listening, speaking, writing, reading) for 50+ trainees
 - Conducted continuous progress evaluation and provided constructive feedback
 - Received internship offer letter from CEO for exceptional performance
 - Developed training materials and assessment tools
-

EDUCATION

Bachelor of Science in Computer Science

Government College of Management Sciences Sangota | 2021 - 2025

- **CGPA:** 3.4 / 4.0
- **Relevant Coursework:** Data Structures, Algorithms, Database Management, Web Development, Software Engineering, Object-Oriented Programming, Computer Networks

Diploma in Information Technology

Max Tech Computer Institute Mingora (KPBTCE) | 2019 - 2022

- **Grade:** B | **Marks:** 959 / 1100
- **Focus:** Office Automation, Web Technologies, IT Fundamentals

Intermediate (Computer Science)

Government Post Graduate Jahanzeb College Mingora | 2019 - 2021

- **Marks:** 756 / 1100
- **Subjects:** Computer Science, Mathematics, Physics

Matriculation

Elum Public School Amankot Mingora | 2017 - 2019

- **Marks:** 889 / 1100
- **Achievement:** Sports Certificate

CERTIFICATIONS & ACHIEVEMENTS

- **Internship Offer Letter** - CEO of Youth Development Institute (2022)
- **5 Achievement Certificates** - Various competitions and programs
- **Sports Certificate** - Matriculation level
- **English Proficiency Certificate** - Youth Development Institute (2021)

TECHNICAL PROJECTS SHOWCASE

Project	Type	Technologies	Status
Smart Garbage Management System	IoT + Full-Stack	ESP32, Sensor, Flutter, Firebase, Realtime Database.	Deployed
Gym Management Website	Full-Stack Web	VS code, HTML,CSS, PHP, MYSQL,	Live
Couple Nest App	Mobile App	Flutter, Dart, Firebase, Cloudinary	Launched
Forensic Facial Recognition	AI/ML	Python, TensorFlow, OpenCV	In Development

ADDITIONAL INFORMATION

Languages: English (Professional), Urdu (Native)

Interests: IoT Development, Artificial Intelligence, Forensic Technology, Startup Innovation, Open-Source Contribution

Availability: Immediate for full-time or project-based opportunities

References and project portfolios available upon request
